

*TQ-Mechanics***TQ-Mechanics**

We develop and produce mechanics for electronics, from design down to realisation. Our focus is on constructing and producing mechanical modules and systems. Our qualified staff is comprised of precision mechanics, toolmakers, mechanics and fitters and assemblers.

In detail, our service spectrum includes the following fields: Design, construction, toolmaking, metalworking, and synthetic materials processing (bending, punching, lathe tooling, milling, and surface treatments such as sandblasting and glassblasting, engraving, and vanishing/painting), 3D precision measurements, module and device assembly.
